

AIR FILTER COMPARISON

- **G3** Commercial ventilation systems for public buildings, incl. offices, entertainment centres, etc
- **G4** Home ventilation systems, some public building ventilation systems
- **F5** Higher grade commercial ventilation for public or specialised areas or buildings
- **F6** Hospitals' general ventilation, dairy & food processing, sensitive manufacturing
- **F7** Pharmaceutical and infant food processing facilities

Particles	Size
Fumes, Smoke	0.1 – 1 micron
Airborne dust	1 – 100 microns
Fungal spores	2 – 12 microns
Plant spores	10 – 30 microns
Pollen	12 – 50 microns

* Indicative only. This graph and the accompanying table converts international test results to show midpoint efficiency relative to particle size. It does not indicate dust-holding capacity.
